

Are you ready to thrive in manufacturing leadership?

Tedia Needs You....

if you are an experienced 1st Shift Production Supervisor who can:

- Drive 6S safety culture in a chemical manufacturing environment, delivering 0 OSHA recordable accidents and continuous year-over-year reduction in overall accident/incident rates
 - Ensure employee empowerment and ownership of safety outcomes
 - Regular near miss reporting
 - Document and execute safety opportunities for improvement
- In close partnership with QA, ensure 1st pass quality for chemical purification, filling and labeling orders in a cGMP environment
 - Participate in root cause/corrective action assessment and execution for non-conforming materials (NCR), corrective action reports (CAR), and corrective and preventative action projects (CAPA)
 - Provide continuous communication on quality excursions
 - Coach compliance and improvement in your direct labor force
- Manage and execute a dynamic production schedule to achieve 100% schedule attainment
- In coordination with a cross-functional manufacturing team, monitor, report and drive continuous improvement on daily production metrics, including chemical filling efficiency, chemical operator efficiency, and schedule attainment
- In coordination with Human Resources, develop, focus and coach metric-based accountability to a wide range of direct reports from entry level chemical fillers to senior chemical operators, maintaining 90% employee retention
 - Continuous performance management
 - Minimum 80% floor time utilizing daily huddles, individual interaction, mentoring and constructive criticism
 - Process and task training
 - Personnel documentation

Tedia Values You...

if you are a leader, coach and mentor who can:

- Take initiative
- Promote teamwork
- Accept and inspire personal accountability
- Produce consistently
- Problem-solve and troubleshoot
- Provide honest, clear and timely communication
- Engage employees and peers in constructive conflict resolution

Tedia Offers You...

the opportunity to grow with a growing company:

Tedia is a global, US-based manufacturing company with a long history of success producing chemicals for laboratories and manufacturers. We don't just sell a product - we sell confidence to customers designing and improving life-saving drugs, testing our environment and certifying our food. We lead our industry in focus on critical solvents for these applications. Our ownership is driven to be the best supplier in our industry and set the standard for exceptional delivery performance and quality.

If you have the required experience and qualifications, please apply by going to www.tedia.com or send your resume and salary requirements to resume@tedia.com.
