

Quality Engineer

Do you have a passion and commitment to the quality of the product you produce? Do you consistently excel in a role that tasks you with ensuring the operation is meeting essential quality standards, across the board? Join the Tedia team!

Tedia, a high purity solvent manufacturer located in Fairfield Ohio, is looking for a Quality Engineer to join our team. As a Quality Engineer, you will drive the process of researching and investigating corrective actions and root cause analysis. Your role will also include achieving cGMP compliance. You will be the final approval on quality reviews and be responsible for establishing good documentation practices, reviewing and signing off on product, process validations, qualifications and other quality related processes. You will work closely with our manufacturing team to provide leadership and support, analyze data and recommend changes to improve quality, ensuring conformance to cGMP, ISO 9001:2015 and industry standards.

Candidates must be independent team players and have strong problem-solving and communication skills, in addition to having:

- Experience in a quality assurance role in a manufacturing environment (chemical environment is preferred), including practical experience in test, inspection and analysis techniques preferred.
- Working knowledge of cGMP is a must! Prior experience having implemented the program will set you apart.
- Working knowledge in validation is a plus.
- Strong leadership of Quality systems requirements; prior experience with IPEC standards is a plus.
- Solid computer skills - SAP or other EPR system is a plus.
- Demonstrated success in supplier quality assurance (strongly preferred).
- Ability to simultaneously execute multiple assignments.
- Effective written and verbal communication skills is required.
- Excellent mathematical and analytical skills are a must.
- Proven ability to interface with our customers and top management to resolve any quality issues that arise.

Tedia offers an excellent compensation package including competitive salary and benefits (health, dental, 401K, and company performance incentive) along with a great family friendly environment for achievement oriented individuals.

Tedia's balance of people and innovation produces leading edge solvents for clients throughout the world. Our diverse workforce, in a highly ethical and family-like environment, offers a fantastic new opportunity with a growing, small, but sophisticated company. If you have the required experience and qualifications, please apply by going to www.tedia.com or send your resume and salary requirements to resume@tedia.com.
